

Jeff Hat *Chief Mechanical Wizard*

Objective: To design the world's first rocket-powered unicycle while sipping coffee.

Experience:

- *Master Tinkerer* at "The Garage of Infinite Possibilities" (2015-Present)
 - Built a time machine but accidentally sent it to the wrong century.
 - Designed a self-buttering toast machine with a 99.9% success rate.

Skills:

- Expert in turning coffee into CAD models.
- Proficient in speaking the secret language of machines.
- Certified in out-of-the-box thinking (literally, I once fixed a machine with a paperclip and a rubber band).

Education:

- *University of Mechanical Madness*, Master's in Mechanical Engineering
- *Institute of Wrenches and Widgets*, Bachelor's in Mechanical Sorcery

Projects:

- Created a perpetual motion machine that only stops to ask for directions.
- Developed a robot that makes pancakes on demand and tells jokes while flipping them.

Hobbies:

- Disassembling toasters to see if they contain hidden portals.
- Collecting rare nuts and bolts from around the world.
- Participating in extreme duct tape challenges.

References: Available upon request, but be prepared for tales of engineering feats and questionable life choices.
